**Agenda Item V:** CMP Amendment 29: Allocation Sharing and Accountability Measures for Gulf King Mackerel

**Documents:** Final Draft (**Tab C, No. 5**), Public Comments Received (**Tab C, No. 5a**), and CMP 29 Codified Text (**Tab C, No. 5b**)

**Timeline Status:** Final Action

**Council Input and Next Steps:**

- Discuss the ACLs used to determine whether allocation sharing would occur. Currently, the recreational ACL in a given year determines whether allocation sharing would occur, regardless of whether that ACL has been modified by allocation sharing. The current approach may be overly conservative. An alternative approach would be to use the original recreational ACL, which is 68% of the stock ACL.
  - Discuss preferred alternatives in CMP Amendment 29. Affirm or modify preferred alternatives, and determine whether document is ready for submittal to the Secretary of Commerce.
-
